

1 What's New

- Two new prototypes was implemented: SrrKeyContainer and SrrLock. These prototypes implement most of the aspects of the concepts of keys and locks. Some extensions were done in the interface of SrrSwitchA and SrrControl.
- These prototypes are used on module "first" (FirstModule.x3d) and on module second (SecondModule.x3d) and in the station house (StationHouse.x3d).
